

## Dynamic Pick Arm Pallet Pick & Material Handling

**PRIME**  
robotics

### Sort 900+ Cases / Hour

Prime Robotics Dynamic Pick and Palletizing Arm is flexible, fast, and can be fully integrated with both our Pallet and Shelf-moving AMR solutions and software.

With the ability to execute multi-box picking, moving payloads of up to 290 pounds, picking cases at a rate of 900+ per hour, and integrated custom stack patterns for optimization, you should look no further. Prime Robotics Dynamic Pick and Palletizing Arm will save you time and money while increasing your throughput and production capabilities.

Max Payload Capacity	290 Pounds / 130 Kilograms
Max Reach	2.99 Meters
Arm Tool	Universal Options
Weight	2,138 Pounds / 970 Kilograms
Power Requirements	480V 3Phase
Safety	Safety Control, E-Stop, Custom Parameters, Laser Curtain

### Software - Flexible & Easy-To-Operate

Flexible, robust and customized to fit your operation, Prime Robotics software is the cornerstone of our automation intelligence and system delivery. With a sleek and professional user interface, we provide full coverage over the Robot Control System, Warehouse Management System, Data Platform, Algorithm Library and API integrations.

### Premier 24/7 Support Services

Prime Robotics is headquartered in Denver Colorado, and our locally-based Support teams are vital to our client's national and global business operations. All Prime Robotics automation solutions are monitored 24/7, and designed with proactive systems using "call-home" technology to identify, evaluate and solve most issues without the need for onsite warehouse engagement.

### Pick Your Production

From Pick and Pallet stations to Hybrid, Decanting, Staging and Packing, we have the custom technology and hardware to automate more of your operations. Achieve the highest-level Pick rates possible with Prime Robotics Pick and Pack stations. From shelving to receptacles, and projection lights to custom touchscreens, our suite of pick stations will elevate the way you manage and fulfill your operations for the marketplace demand of tomorrow.
