

MobileShelf
Goods-To-Person Pick Automation

Efficient. Productive. Scalable.

Prime Robotics leads the industry with efficient and scalable solutions for Goods-To-Person warehouse Picking and Packing. Our MobileShelf AMR and Piece Pick Station solutions can deliver up to 300+ picks per hour, while also eliminating pick errors completely from your operations. With Prime Robotics Warehouse and E-Commerce Pick solutions, your team can realize intelligent and efficient pick operations that save you time and money, allowing you to scale your operation for future growth and flexibility.

Save Time

MobileShelf is the premier goods-to-person pick solution for Warehouse, E-Commerce and Factory environments. With the ability to achieve 350+ picks per hour, eliminate pick errors, reduce product touches and save you thousands each month, MobileShelf is the perfect solution for your Receiving, Put Away, Picking, Packing and Shipping operations.

Eliminate Errors

Reduce Costs

Max Payload Capacity	1,100 lbs. / 500 kg

Weight	400 lbs.
Battery Life	10 Hours
Shelf Size	125cm X 125cm x 243cm
Safety	2D LIDAR, Bump Bars, Emergency Stop Button, Code Navigation

"Just as the new warehouse was opening up and I was turning on the Prime Robotics MobileShelf system, COVID-19 hit. Online sales went through the roof and I had no way to hire additional labor. After 2 weeks, MobileShelf helped me scale from 1 to 1,000 orders daily. The cost and deployment was easy, so it was hard for me to comprehend why I didn't make the transition years ago."

-Eugene Khorosh, Founder & President, McDonald Paper

MobileShelf Goods-To-Person Pick Automation

Software - Flexible & Easy-To-Operate

Flexible, robust and customized to fit your operation, Prime Robotics software is the cornerstone of our automation intelligence and system delivery. With a sleek and professional user interface, we provide full coverage over the Robot Control System, Warehouse Management System, Data Platform, Algorithm Library and API integrations.

Premier 24/7 Support Services

Prime Robotics is headquartered in Denver Colorado, and our locally-based Support teams are vital to our client's national and global business operations. All Prime Robotics automation solutions are monitored 24/7, and designed with proactive systems using "call-home" technology to identify, evaluate and solve most issues without the need for onsite warehouse engagement.

Pick Your Production

From Pick and Pallet stations to Hybrid, Decanting, Staging and Packing, we have the custom technology and hardware to automate more of your operations. Achieve the highest-level Pick rates possible with Prime Robotics Pick and Pack stations. From shelving to receptacles, and projection lights to custom touchscreens, our suite of pick stations will elevate the way you manage and fulfill your operations for the marketplace demand of tomorrow.
